

WESTFIELD  
BESPOKE CARPETS & RUGS

We specialise in the design and supply of luxury handmade carpets and rugs.

We produce custom made and standard carpets from plain broadloom to complex designs and textures.

Our objective is to offer a comprehensive range of carpets for domestic and commercial projects, with specialist knowledge in yacht and aircraft installations.

We only supply the very best luxurious hand made carpets: working with finest silk, wool, worsted wool, cotton and bamboo yarns.

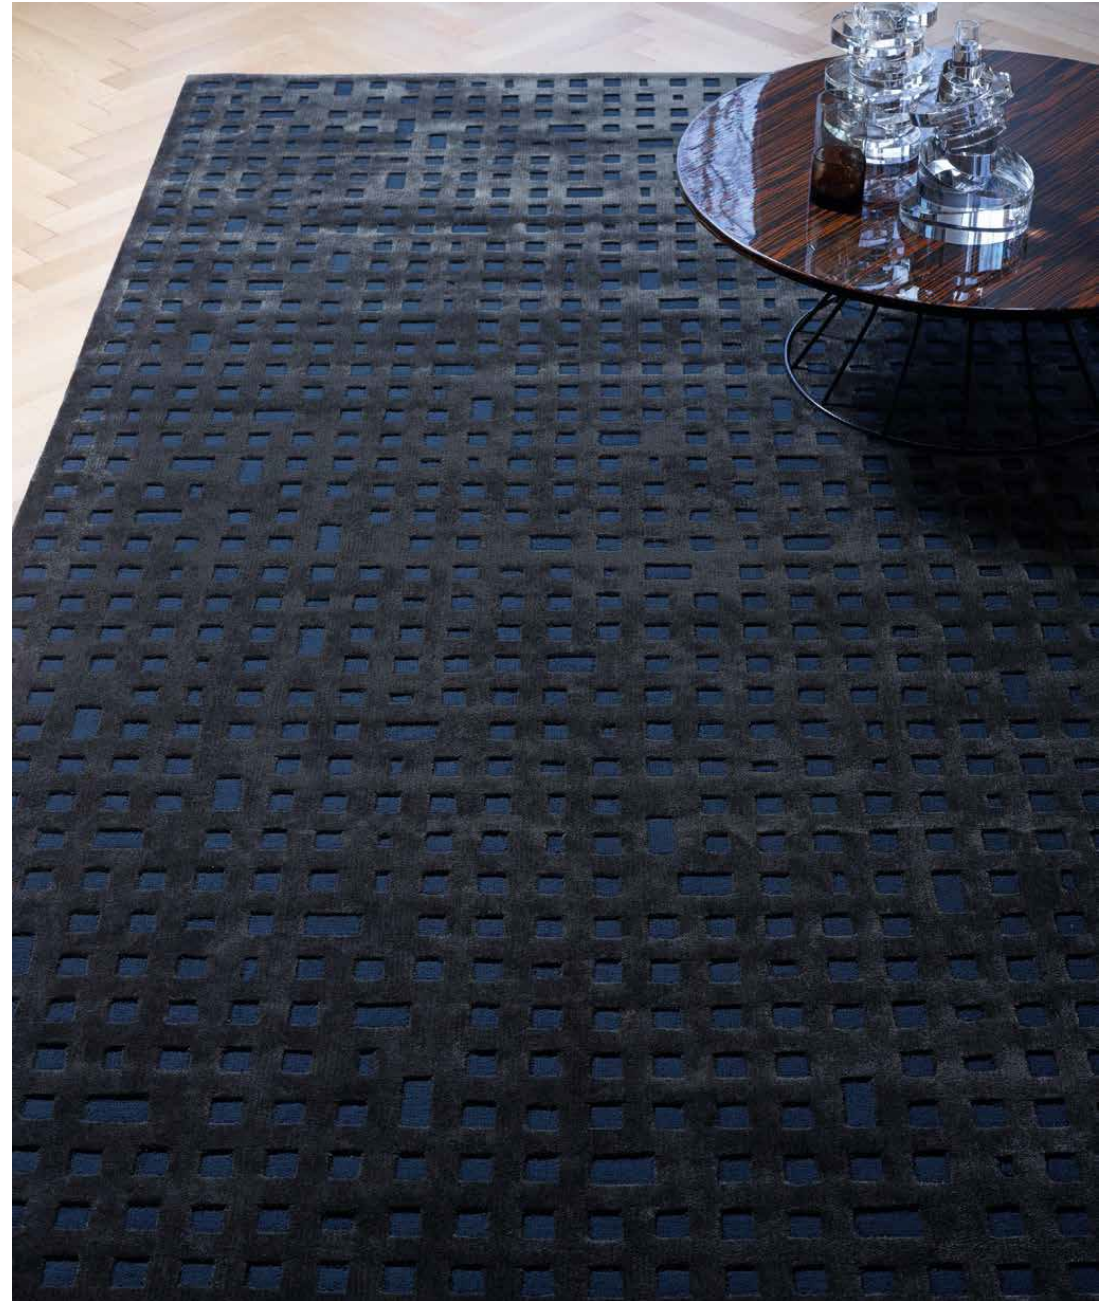

We strongly believe that there are no shortcuts in providing the best possible quality of product and service to our customers.

Traditional production methods are used for the manufacture of every Westfield Hand Knotted Carpet; from yarn spinning & dyeing to washing & finishing, all processes are carried out by highly skilled craftspeople using techniques passed from generation to generation.

Custom colours are available in most qualities.

These qualities include Handtufted, Handknotted, Customtufted, Passmachine, Woven and Machine tufted.

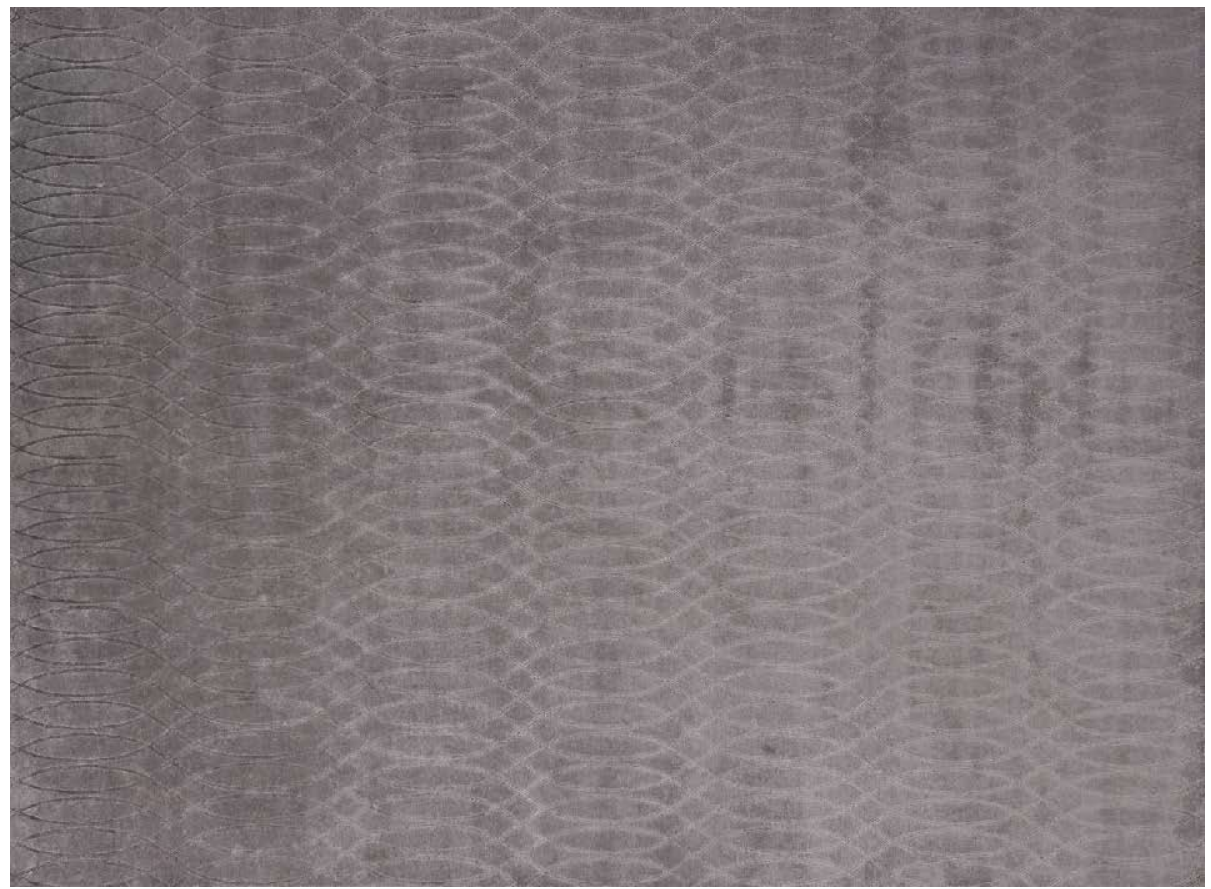

Whether for a private residential interior, large commercial project, or yacht, Westfield can supply fitted carpets or loose laid rugs in any size, any shape and any colour.

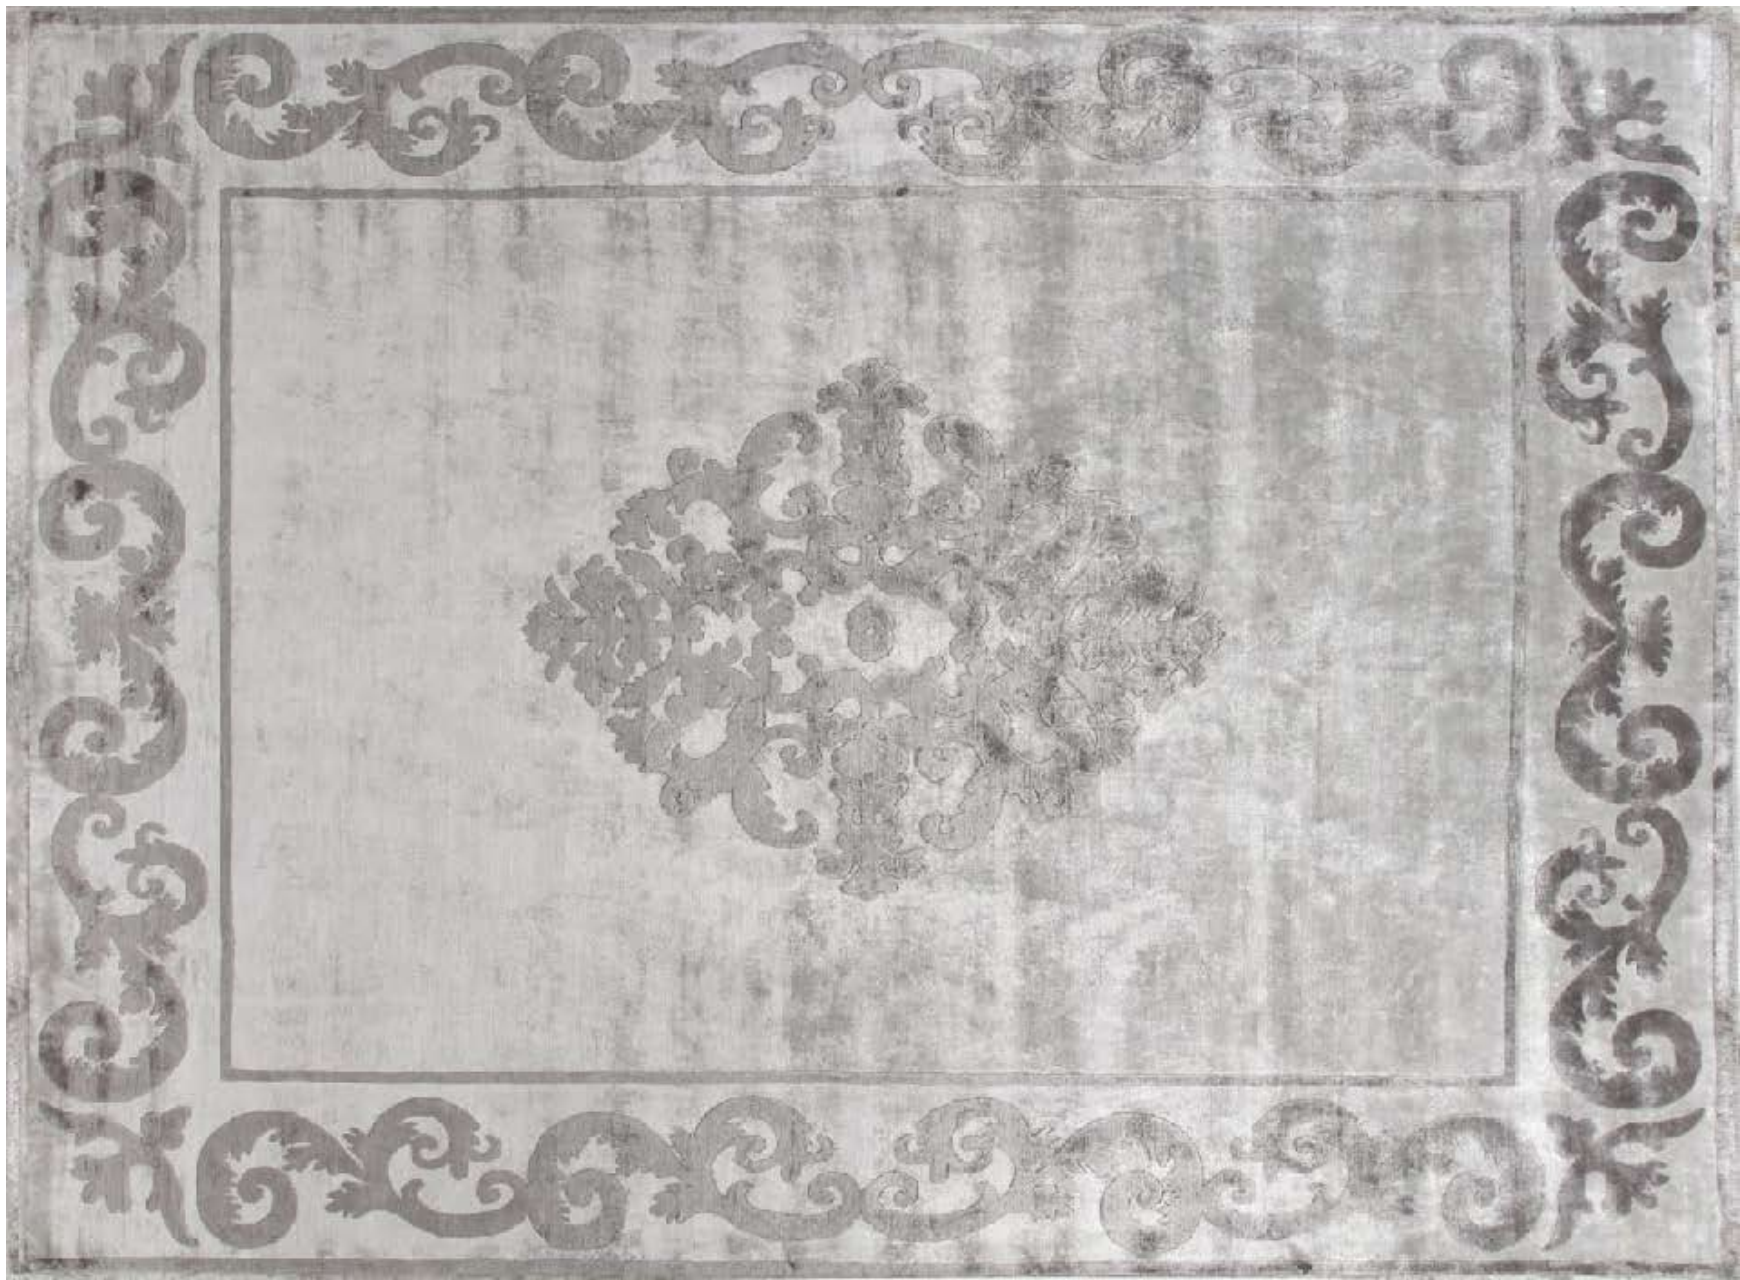

Whether it is the simple opulence of a bespoke luxury silk carpet in a plain custom dyed colour or an intricate border design following the contours of an elaborate staircase, every project is designed to suit the specific requirements of each individual interior offering a truly bespoke product.

To complement our handmade carpets we also offer luxurious plain custom machine made carpets in wool and silk qualities that can be dyed to any colour and supplied to fit any room shape without seams.

We are happy to work with you to create original designs to suit your individual requirements. The possibilities are limitless due to the sheer diversity of material, colours and shapes available.

Generations of craftsmanship and a genuine respect for using the finest wools and silk, are deeply embedded into our progressive business and have led to our skills being sought globally.

A beautiful carpet or rug can, and should, be a key feature of every space. That's why we spend time providing a considered, confidential and personal service to every single client that we work with.

Our aim is to produce something unique, from the finest natural materials, that both we and you will be proud of.

We're proud of our heritage, our people and our designs.  
Quality in design and craftsmanship is guaranteed with every Westfield™ carpet – each one is made using our traditional methods and individually inspected.

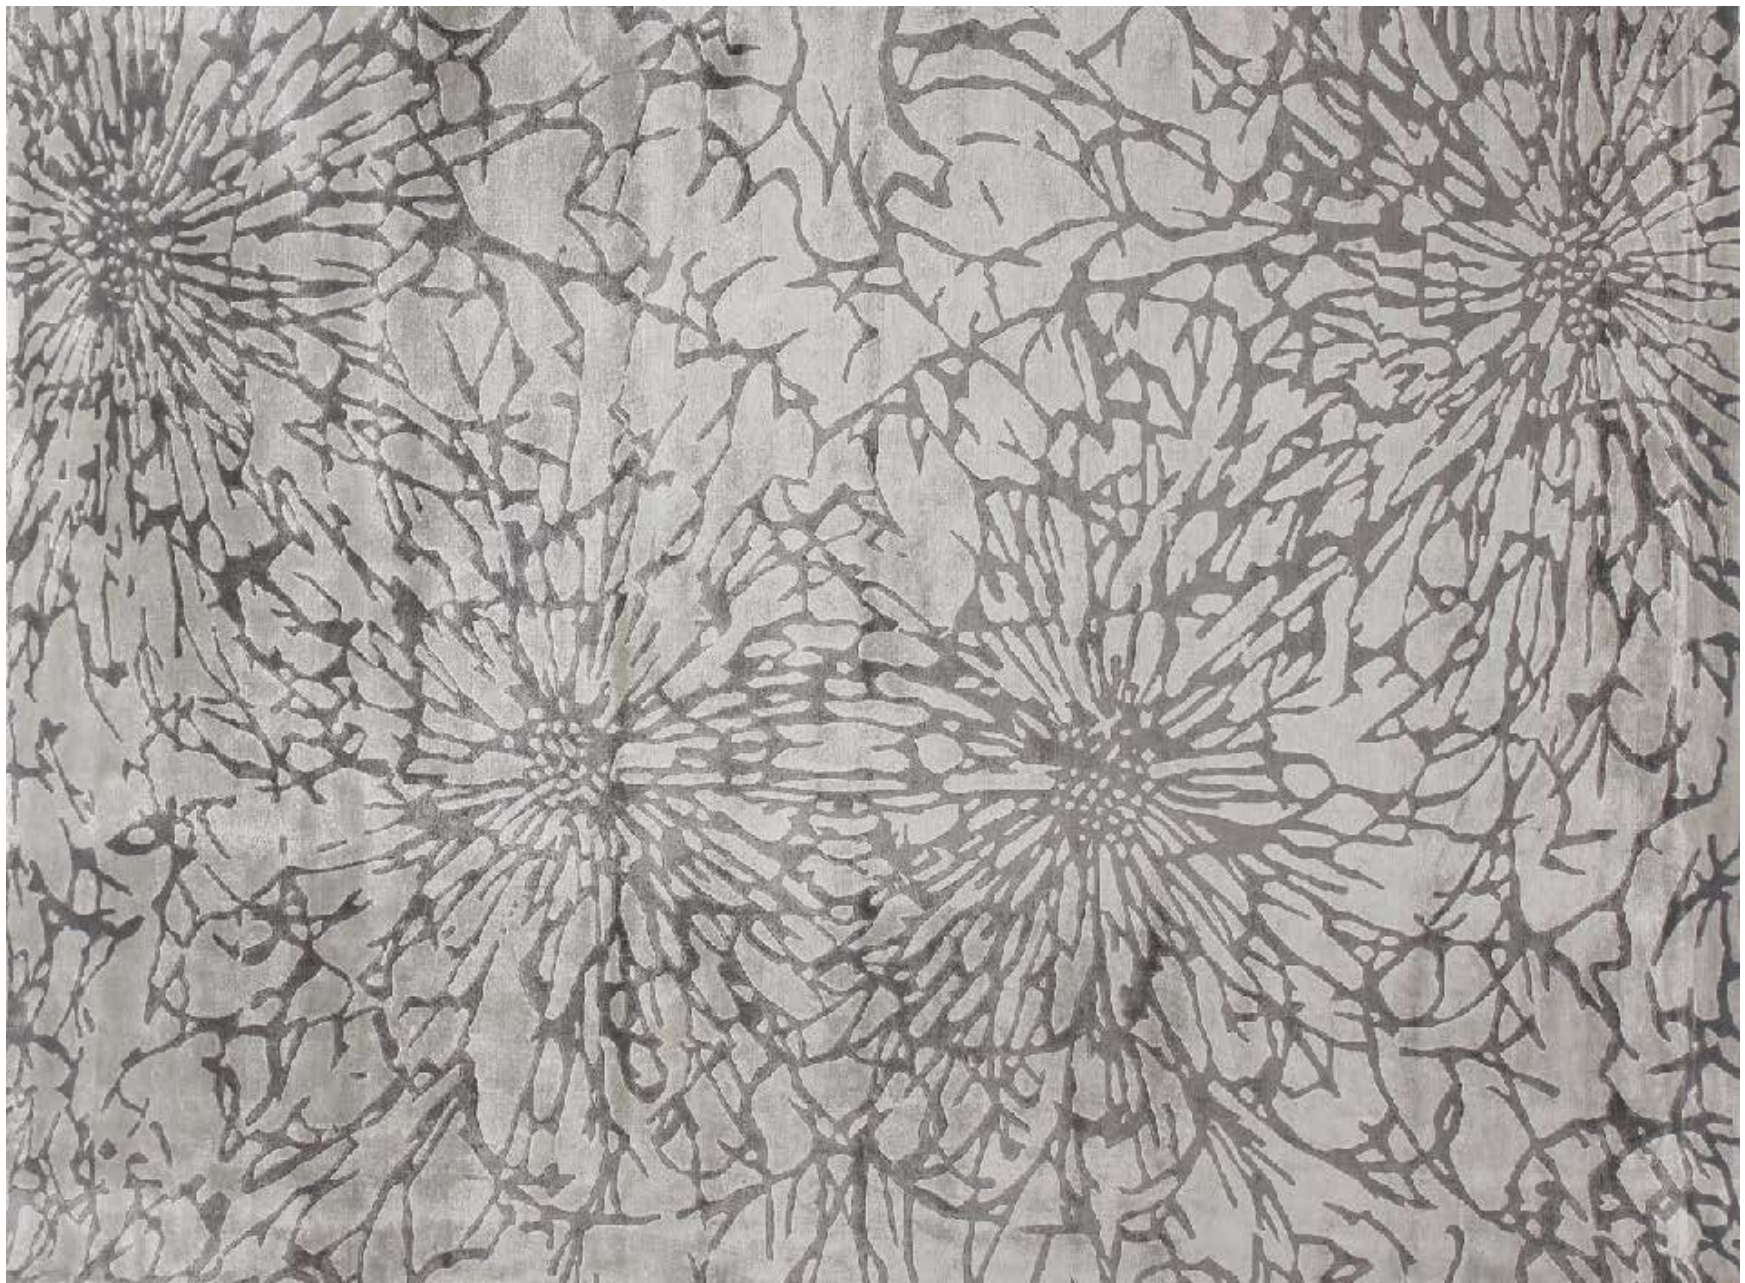

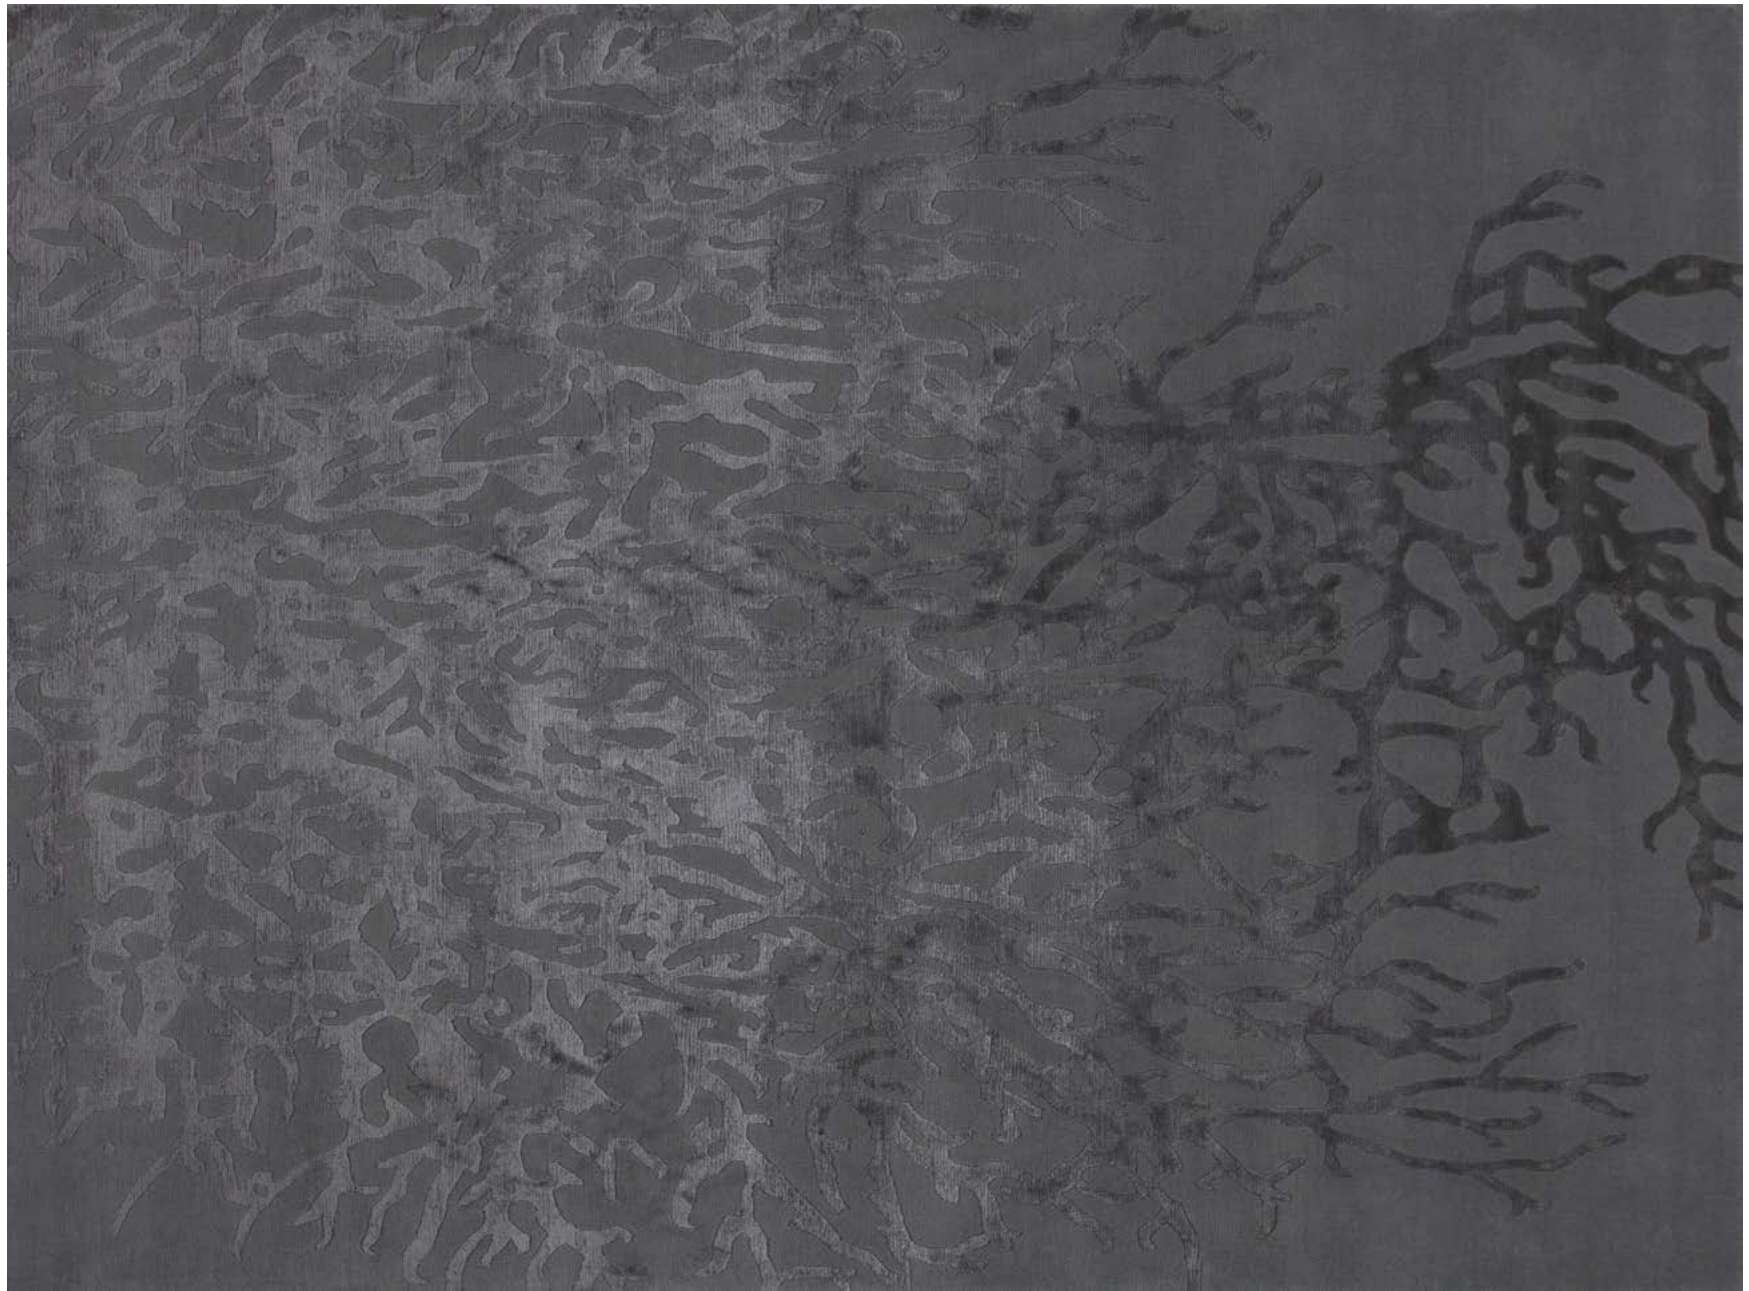

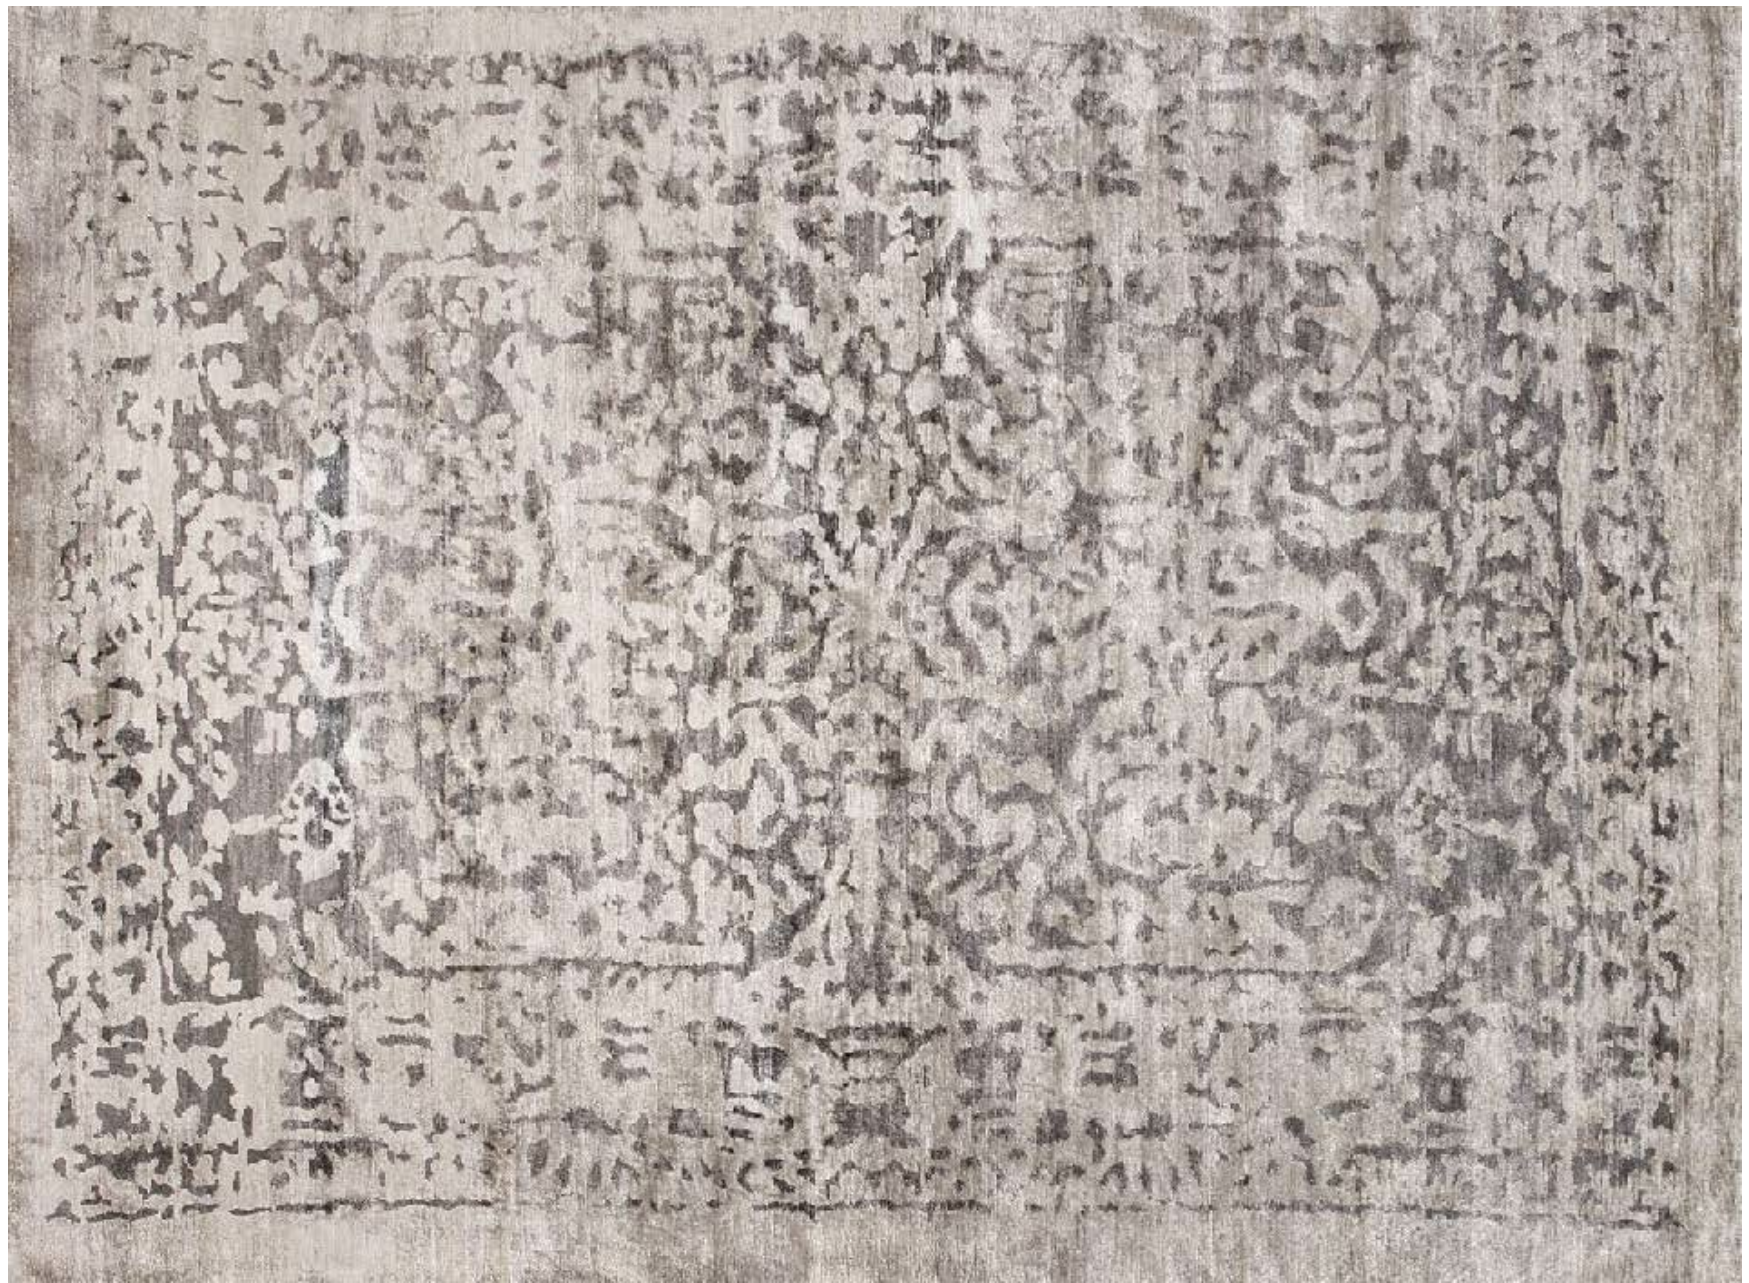

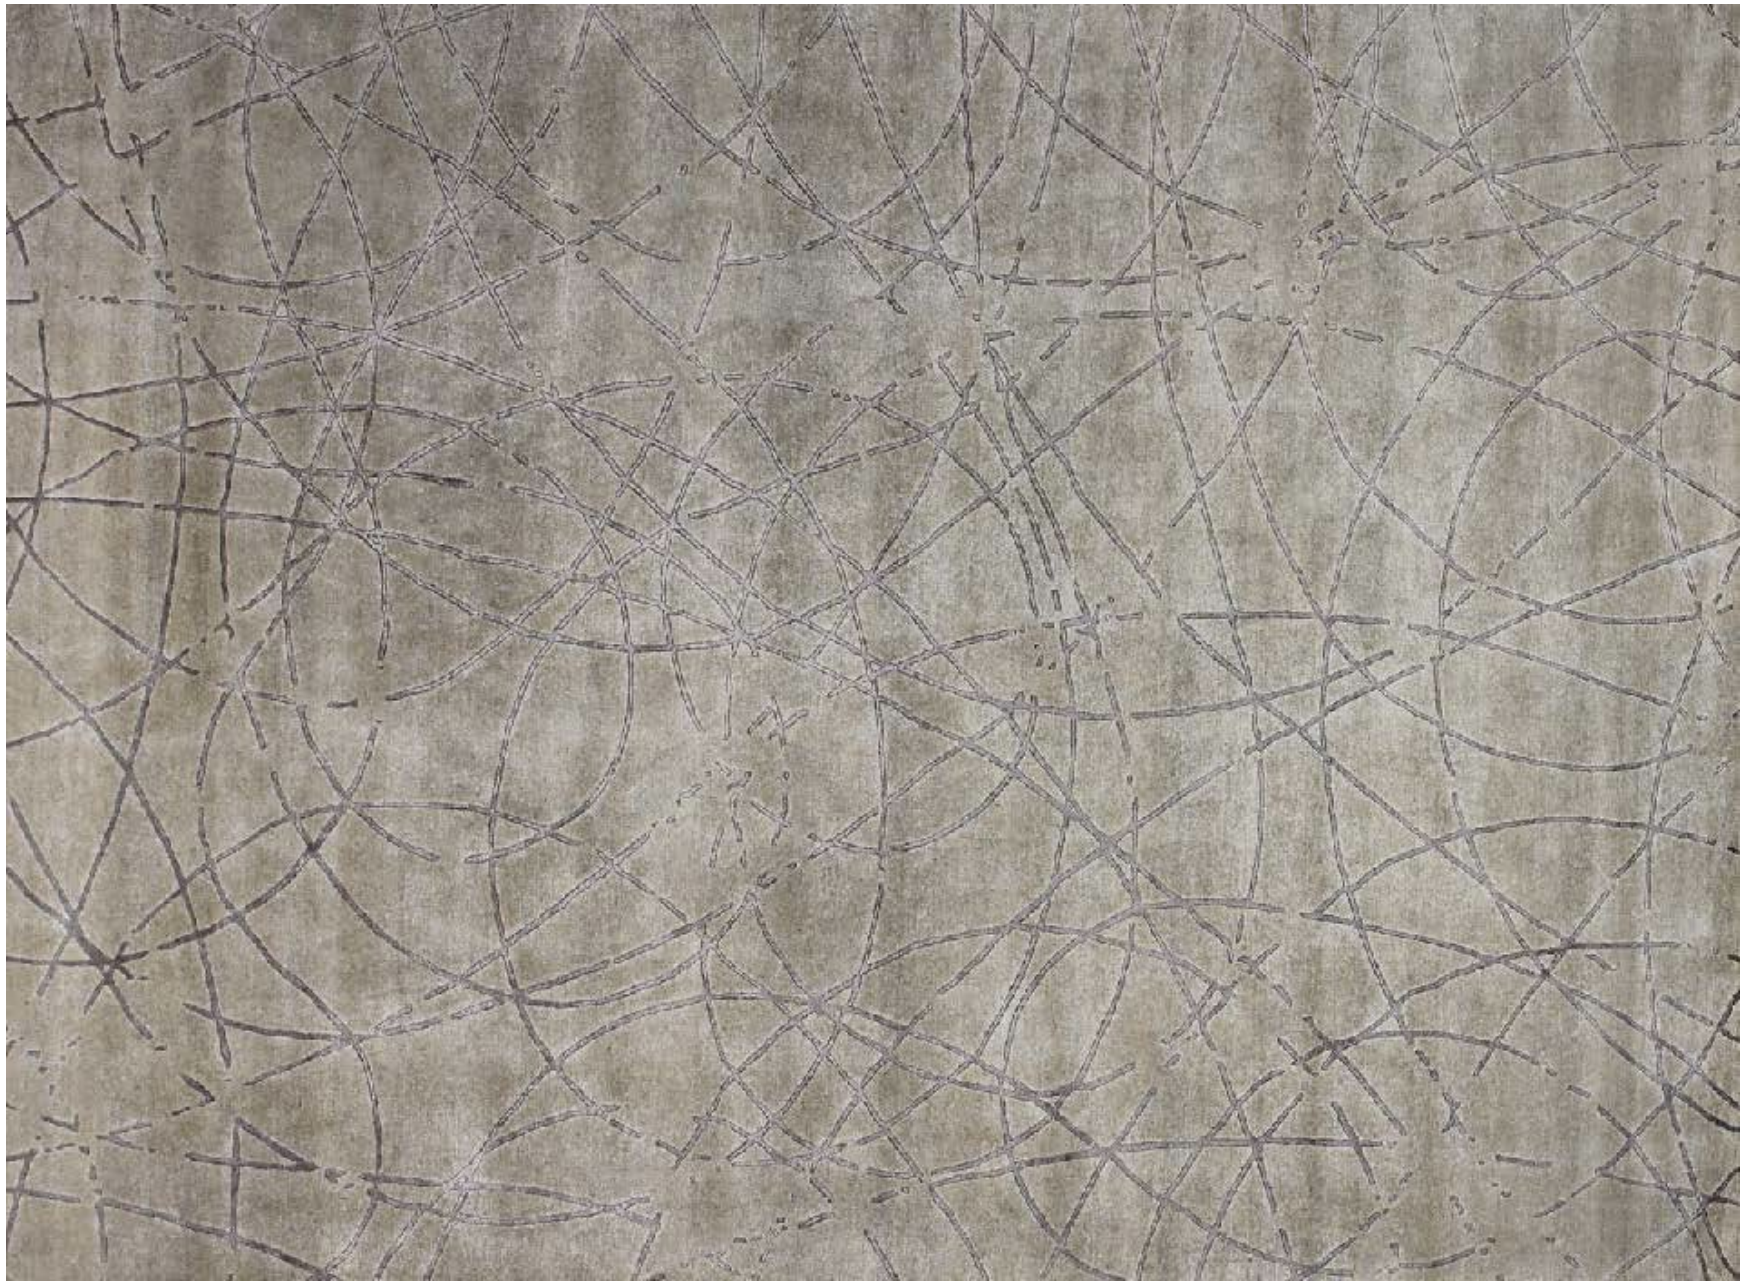

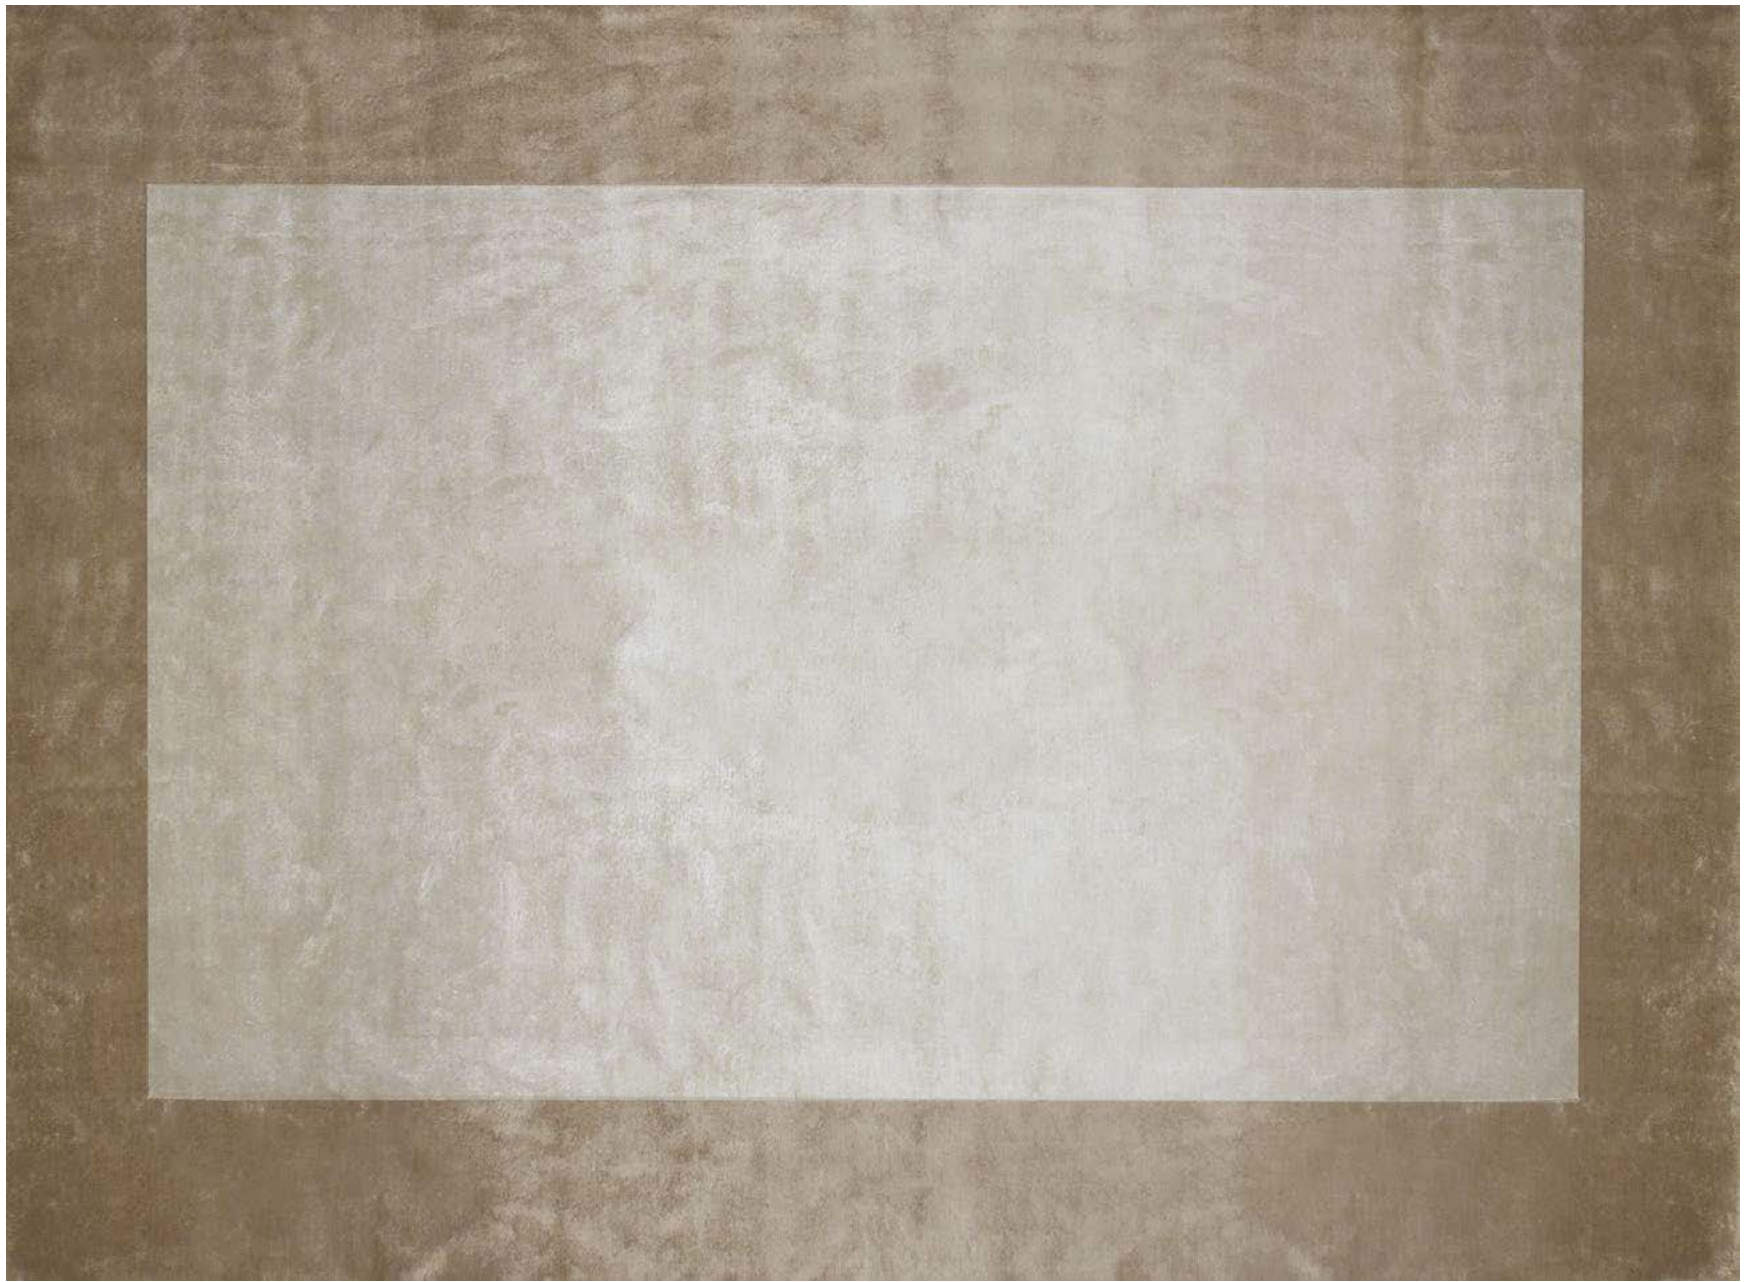

We have a full support service that can offer assistance with all aspects of project planning, including product advice, estimating, site surveys, installation and transportation.  
These services are available throughout the UK and overseas.

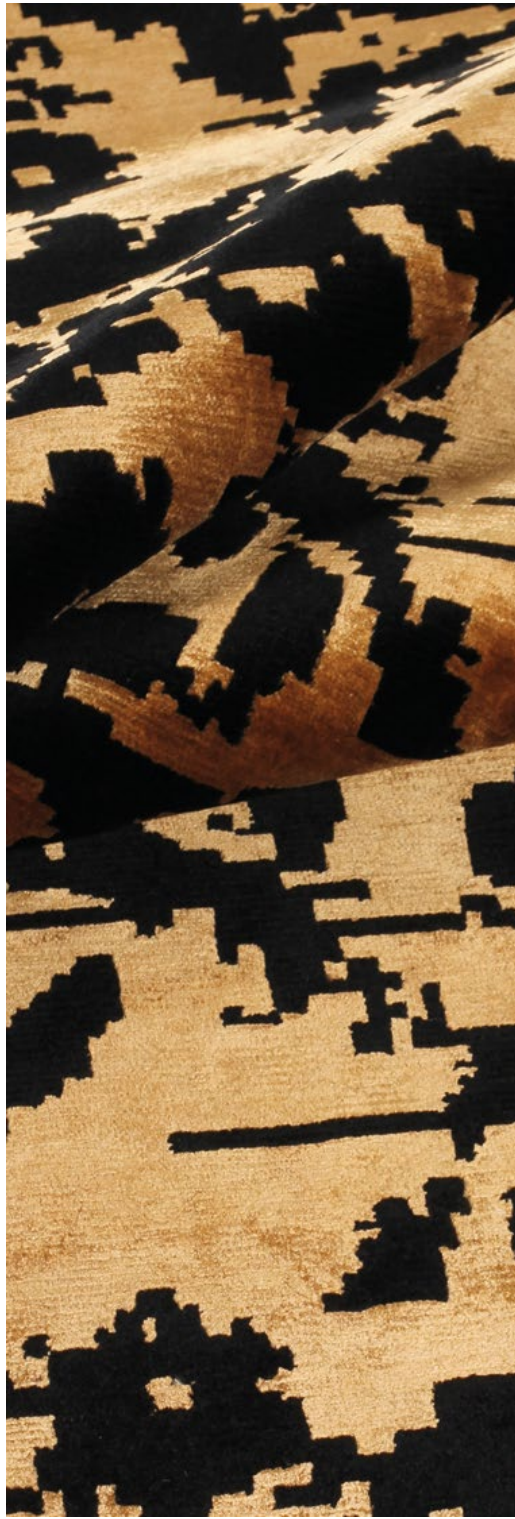

Should you require design assistance or pricing information
